About MDCSystems®

MDC®'s mission statement: Our knowledge, experience and credentials work together to solve your engineering and project construction challenges.

MDCSystems® is a Consulting Engineering organization specializing in Project and Construction Management consulting, including Forensic Engineering and Forensic Project Management®. As a Small Business, per SBA guidelines, and a self-certified small business with the Pennsylvania Department of General Services, MDC®'s Experts provide world class service to Government Agencies and Departments. MDCSystems® has a fifty year history of serving industry and government and is licensed in seventeen states, Ireland, United Kingdom and the European Union.

MDCSystems® Experts include licensed professional engineers (mechanical, civil, structural, electrical and environmental), licensed architects and accountants. MDC® senior professionals have an average of over thirty years of hands-on national and international design, construction and project management experience. MDC®'s experts make successful witnesses because of their impeccable credentials, qualifications and field experience. They have qualified as expert witnesses in Board of Contract cases, both State and Federal Court venues and in International Arbitration settings. This expertise, in combination with fact-based scientific methods of investigation, provides clients with reliable, consistent and persuasive expert analysis and credible opinions.
